

STRONG CLAIMS OF REPUBLICANS

Secretary Loudenslager Gives
Republicans Congress by
a Majority of 63.

New York, Oct. 29.—Representative Henry C. Loudenslager of New Jersey, secretary of the national Republican congressional committee, who has been in charge of the committee during the campaign, today gave out his estimates of the complexion of the national house of representatives in the Sixty-first congress.

Acid And Alkali In The Stomach

Digests The Food Naturally If In
Right Proportion; If Not:
Then Dyspepsia.

Acid and alkali make up the liquid known as gastric juice, which digests your food.

If through abuse of the stomach, or weakness of blood or through scores of other causes this gastric juice is not made up correctly of acid and alkali, your stomach cannot then act as a pit where the food lies, ferments, decays, is thrown off at last, either into the intestines or is vomited from the system.

If thrown into the intestines a large proportion of it is taken up and passed into the blood, for the intestines are covered on the inside surfaces with millions of little mouths which are placed there to suck up nourishment for the blood. You may readily see that if instead of good rich nourishment, there is vile, poisonous, fermented bile and acid, these little mouths suck some of it by necessity and pass it into the blood. The blood in turn throws it off and the system is immediately placed in an imperfect state.

The blood is weakened, the tissues lose strength, the skin becomes diseased and man in general suffers in a score of places.

Then again the blood furnishes gastric juice to the stomach, for when the gastric juice is not needed for digestive purposes it goes back to the blood. When food comes into the stomach the nerves along the Alimentary Canal and in the mouth signal the brain to furnish the blood immediately sufficient gastric juice to do the work well and quickly.

Stuart's Dyspepsia Tablets go into the stomach, balance the gastric juice, digest the food, are taken up by the blood, purify it, and when the food comes again to the stomach a natural gastric juice of right proportion greets it and does its work perfectly. After a time these little tablets restore nature, build up the gastric juice and there is no longer dyspepsia.

Every druggist carries them in stock; price low; every druggist and 40,000 physicians will attest their worth to the merit of these tablets. Buy a box now and relieve your stomach at once, or send us your name and address today and we will send you immediately by mail a sample package free. Address F. A. Stuart Co., 121 Stuart Bldg., Marshall, Mich.

Are Your Feet Tired?

Then you should provide your feet with the shoe that's flexible, that conforms to the shape of the foot, and then you'll have comfort—never before.

SHERMAN TALKS ON PROTECTION

As a Representative of the "Interests," Candidate Presents Only One Side.

Albany, N. Y., Oct. 29.—After a day of active campaigning through the Adirondack mountains in Warren county, J. S. Sherman, Republican vice presidential candidate, tonight addressed a large audience at Albany. Mr. Sherman reached here on a special train at 6 o'clock, coming from Warrensburg, where he addressed a large meeting at noon. After dinner the candidate was escorted to the hall, where he was given a generous welcome.

After discussing general campaign issues, Mr. Sherman sharply attacked Mr. Bryan's attitude toward the foreign markets for American manufactures. He said in part:

"Mr. Bryan and his echoes find fault because sometimes articles of American manufacture are sold abroad at lower prices than at home. This is one plea for striking down protective duties to the damage of American industries. Let us turn on the searchlight and get at the exact truth. The annual product of American manufacturers is about \$15,000,000,000. It was in 1905, the last census year, \$14,821,470,000, hence local industries and trades, and no other nation manufactures so much in a like period. Of this vast product our people consume at home all except from one-fourth to one-third."

"No expert with any title to accuracy ever reckoned that on so much as 5 percent of American manufactures exported there is a concession in price taken place abroad below the domestic standard. The American free trader is the only one who finds fault with the practice of all markets. And he does only to force a weapon against protective tariff."

The clamor against any concession in price abroad in order to broaden our markets and bring additional employment to our furnaces and factories is the latest exhibition of the frenzy of Bryanism against American industry. It is a part of the hostility against the protective system. The task of these partisans is to destroy, not correct."

UNIVERSITY NOTES.

The annual election of officers of the engineering society at the university was held yesterday. E. D. Moffet, a junior was elected president; vice president, W. R. King; secretary, A. E. Crandall; treasurer, J. Thurston; historian, R. Brighton. The executive committee consists of Conville, J. Glen, Keen, Leland, Walker, '11, and Sam Brinton, '12. There was a large attendance at the meeting, and nearly three hundred of the engineering students took out membership cards.

The university student body gives its annual autumn dance this evening in the gymnasium. This is one of the big dances of the year and a large crowd of students and friends of the university will attend. Professor Levi Edgar Young of the history department is collecting information on the early history of Utah. He has associated with him in this work Rev. Fr. D. Kieley, V. G., who has made an extensive study of the early history of the west. Professor Young is at present corresponding with the University of Mexico to get copies of records that have been kept at that institution.

The matinee dance that was set for this afternoon in the girls' gymnasium has been postponed until next Friday afternoon.

There will be no holiday at the university as was voted by the faculty at the last regular meeting. The holiday was given the students to enable them to attend the football game in Logan with the Aggies, and since this has been called off, President Kingsbury posted a notice yesterday that school would be in session on that day.

Rev. W. M. Paden of the First Presbyterian church will address the students at chapel this morning. The meeting of the student body scheduled to take place after chapel will not be held until next week.

Dean Byron Cummings of the school of arts and sciences addressed the medical students yesterday afternoon at the regular meeting of the medical society.

The girls' cross country club had its first workout yesterday afternoon, and about twenty girls under Professor Maud May Babcock went over the course, which is about two miles long.

OUT OF CANAL BUSINESS.

James H. Brady Has Sold Out to the Idaho Farmers.

Idaho Falls, Ida., Oct. 29.—James H. Brady, Republican candidate for governor, yesterday disposed of his remaining interests in the Idaho canal system to the Idaho Irrigation District, composed of farmers under the canal system, for \$200,000. Possession was given immediately. Negotiations have been pending two years. The system comprises two hundred miles of main canals and two hundred miles of laterals, and the deal itself comprehends a hundred and twenty miles of canal. Mr. Brady retires permanently from the canal business. He built the canal fourteen years ago.

"This closes out the last piece of canal property I own," said Mr. Brady, "and I expect to retire permanently from it in so far as I am able to encourage others in the development of irrigation enterprises within our state. I am not retiring because the business is not profitable, but for the reason that I have believed for years that the successful solution of the irrigation question in the arid west is the owning of canal property by the farmers themselves."
